SHARP WELCOMES POWER PROTECTION AND ANALYTICS SOLUTIONS PROVIDER TO THE SHARP PARTNER PROGRAM

Innovolt to provide Sharp customers with proven solutions for power protection

MONTVALE, NJ, February 28, 2017 – Sharp Imaging and Information Company of America (SIICA), a division of Sharp Electronics Corporation (SEC), announces that Innovolt, a technology leader in comprehensive power protection and analytics solutions, has joined the Sharp Partner Program.

Recently, Innovolt's power protection solutions received full validation as a Sharp Compatible Product and can function seamlessly with Sharp multifunction products (MFPs). Combined with Sharp's current offerings, Innovolt's proven solutions can help Sharp customers of every size experience greater uptime for expensive and sensitive technology, while giving businesses the tools they need to predict, measure and maximize the performance of assets across the distributed enterprise. Together with Sharp, Innovolt's tools will drive meaningful service call reductions that allow customers to compete and grow without increased fixed costs.

"Sharp is proud to announce the availability of the Innovolt portfolio of power protection solutions," said Shane Coffey, Associate Vice President, Hardware Product Management, SIICA. "The application of power protection products in situations where the power is inconsistent can help reduce service calls and contribute to increases in both dealer profitability and customer satisfaction."

"We are excited about this opportunity to work with both Sharp Business Systems and Sharp's impressive network of dealers," said Jun Ho Son, CEO, Innovolt. "We share Sharp's focus on innovation and customer satisfaction and look forward to helping Sharp Business Solutions and Sharp dealers leverage our technology to further enhance performance and uptime for their customers."

Through Innovolt's fleet-wide monitoring and analytics capabilities, Sharp service managers and technicians will be equipped with information to help more quickly resolve issues that happen out in the field. From Innovolt's microprocessor technology to cloud-based management software, they offer the complete solution for sophisticated electronics management.

About Innovolt

Innovolt's power protection solutions combine patented sensor, remediation, monitoring and analytics technologies to help companies safeguard and optimize the performance, productivity and usable life of the electronics that power today's digital world. As the first company to provide complete power protection and asset management software, we solve a host of unique problems that most businesses and consumers are not aware of but are paying for through shortened electronics lifespan and decreased product reliability. Our power protection technologies and analytics capabilities help businesses increase the uptime and lower the service costs of their electronic equipment while increasing overall customer satisfaction.

About Sharp Electronics Corporation

Sharp Electronics Corporation is the U.S. subsidiary of Japan's Sharp Corporation. Sharp is a worldwide developer of one-of-a-kind home appliances, networked multifunctional office solutions, professional displays, robotics and energy systems.

About Sharp Imaging and Information Company of America: Sharp Imaging and Information Company of America, a division of Sharp Electronics Corporation, markets the advanced, MX Series multifunction printer (MFP) systems that help companies manage workflow efficiently and increase productivity. As a leader in security within the MFP industry, Sharp MFPs feature the Sharp OSA[®] development platform, which seamlessly integrates network applications to create a personalized MFP that can meet virtually any business need, and Scan² technology, which scans two-sided documents in a single pass to enhance scanning reliability and preserve document integrity.
